WHEN YOU WASH YOUR HAIR DON'T USE SOAP

Most soaps and prepared shampoor contain too much alkali, which is very injurious, as it dries the scalp and makes the hair brittle.

The best thing to use is just plain mulsified cocoanut oil, for this is pure and entirely greaseless. It's very cheap, and beats soaps or anything else all to pieces. You can get this at any drug store, and a few ounces will last the whole family for months.
